

Overview:

The purpose of an Arterial Preservation Plan is to develop a holistic approach that identifies ways to ensure the safety and preserve the capacity of the Commonwealth’s arterial highway network without wide scale roadway widenings. This Arterial Preservation Plan has been requested to identify investment recommendations that will help preserve and enhance this key transportation corridor due to the important role it plays in the region as a key freight corridor serving the Port of Virginia, a vital link within the Commonwealth, and a key facility for connections to North Carolina and points south.

Stakeholders:

Localities involved in the study include Brunswick County, Mecklenburg County, Town of Boydton, Town of Brodnax, Town of Clarksville, Town of LaCrosse, Town of Lawrenceville, Town of South Hill. In addition to the localities involved, the Southside Planning District Commission is also a critical stakeholder of the project.

Lengths and Limits:

The study area traverses Brunswick and Mecklenburg Counties and extends from the Hampton Roads construction district boundary at the Greenville / Brunswick corporate limits to the western termini at the Lynchburg construction district boundary at the Mecklenburg / Halifax corporate limits. The study area is 65.7 miles in length.
